We will insert subchapters from a Game Design Document (GDD) into the first four chapters of the dissertation.
Any additional information beyond the proposed content is welcome.

Table of Contents

1. **Introduction**
   - Context
   - General information about the proposed game
   - Stating the theme and the game's name
   - Highlighting the game type (RPG, FPS, etc.)
   - Target audience – Who is the game created for?
   - The motivation behind creating this game and your objectives
   - Player objectives in the game
   - A short description of the game (3-4 sentences)
   - Dissertation structure (a brief 1-2 sentence description of the dissertation chapters)
2. **Domain Study**
   - Presentation of 3-4 similar games to the one you developed
   - Focus on the main mechanics and technologies used in the presented games
   - Conclusions drawn from the studied games by comparing their mechanics and features with your game
   - At the end, a table similar to the one below will be included:

Game name	**Mechanic 1**	**Mechanic 2**	**Mechanic 3**	**…**	**Other features**	**Mechanic n/ features n**
Game 1						
Game 2						
Game 3						
Your game						

Table Explanation

3. **Theoretical Foundations**
   - Listing the technologies used, including those related to art.
   - Detailed explanation of the most interesting mechanisms/libraries used in the game.
   - **Systems and AI –** Explanation of agent/NPC functionalities (only the parts used, not implemented by the student).
4. **Proposed Solution and Design/Development Methodology**
   - Creating a general diagram highlighting the mechanics developed in the game (if two students are working on the game, a general game diagram is created, followed by a detailed diagram of each student's contributions).

- Explanation of the proposed diagram, focusing on the purpose and functionality of the following elements. **DO NOT DISCUSS IMPLEMENTATION!**
    - **Main Mechanics** – Movement, combat, crafting, puzzles, interaction, etc.
    - **Progression System** – Levels, skill trees, upgrades, quests.
    - **Economy & Resources** – Currency, loot, energy, crafting materials.
    - **Difficulty & Balancing** – How challenges adjust based on player progress.
- Explanation of proposed algorithms through a block diagram.
    - Example: Procedural generation, state machine used in AI, etc.
- **Class Diagram Presentation** – Focusing on the main classes used in the game.

5. **Implementation**

   a. **Code Implementation**
    - Detailed explanation of how each feature and/or mechanic in the game was implemented.

      b. **Art Implementation**

      i. 2D/3D modeling

      ii. Audio processing

      iii. Game narrative

      c. **Other Aspects**

6. **Game Testing and Experimental Results**
    - **Unity Test Framework**
      Documentation
    - **Game Usage Results – Unity Analytics**
      Documentation
7. **Conclusions and Discussions**
    - Summary of the completed work.
    - Presentation of technical challenges encountered during development and their solutions.
    - Comparison of the developed game's advantages over the games analyzed in Chapter 2.
    - Discussion of future mechanics/features planned for the game, possibly referencing test results.
8. **Bibliography**
    - Format:
      [number] Source name, link, access date

Annexes

1. # High Concept Document
2. **List of Figures and Tables**
    - **Format**:
      Figure no., Figure name, Page
      Table no., Table name, Page
3. **Glossary of Terms**
4. **Links** – Gameplay video, build, repository

Final Page of the Dissertation

- **Statement of Authenticity** – Completed and signed with a blue pen.

Additional Notes

- **Citations** should be in **[number]** format, with sources listed in the bibliography.
- If you read information from a source, **rewrite it in your own words and cite the source at the end of the paragraph** (no copy-pasting).
- **Quoting means stating the source of your information, not copying text.**
- Each chapter **must start on a new page.**
- **Wikipedia is not allowed** as a source.
- **Formatting:**
    - **Paragraph text –** 12 pt, Times New Roman, **line spacing: 1.25**
    - **Chapter titles** – 14 pt, Times New Roman, **Bold**
    - **Subchapter titles –** 12 pt, Times New Roman, **Bold**
